

Wood & Laminate Underlay Selector

Each Floorwise underlay has unique performance characteristics and we offer a comprehensive range to suit most applications. In order to help simplify product selection we have created a recommendation table for you to be able to easily compare the underlays at a glance.

Please note that generally the denser the underlay the better it is at reducing sound, which is why Rubber underlays are generally the best option for this application.

Range name	Product	Use						Performance				Specification				
		Material	GB	MB	L/DR	H/S/L	Comm	Support	Impact Sound Reduction	Airborne Sound Reduction	Moisture barrier	Thickness mm	Dimensions w x l = m ²	Density kg/m ³	Roll weight kg	TOG
