

Carpet Underlay Selector

Each Floorwise underlay has unique performance characteristics. We have included a recommendation table for you to be able to easily compare the underlays. Please note that generally the thicker the underlay, the better the underfoot comfort, whilst the greater the density the better the underlay will perform over time.

The table includes a classification column, which rates the underlay according to BS EN 14499 standards. Also included in the table are TOG ratings, with some underlays being better insulators than others. Finally, there is an impact sound rating, which is a guide to how well the underlay suppresses noise from the room above.

Range	Product	Use					Performance			Specification
